**SECTION –A (Reading) (20 marks)**

**A1) Read the passage carefully and answer the questions that follow: (12 marks)**

**Stress busters (12)**

“The most obvious way to avoid examination stress is to be fully prepared” is an oft-repeated advice from the experienced elders. They ignore two facts: first, the most stressed students are the highest achievers who set unrealistic goals for themselves; second, asking students to relax is easier said than done.

“Is there no way to calm the tired nerves that seem to accompany examinations and the resultant exam blues?” ask the anxious students. Well, there are no pills, quick- fix methods or sure- shot ways to combat stress. However, certain steps, if followed properly, can yield the desired results. You must discuss your anxiety with friends or family. When you express a feeling or emotion, its intensity automatically goes down, making it easier for you to cope.

Usually, anxiety sets off a chain reaction where students imagine what would happen if they do not get good marks which add to the nervousness. Psychologist advice that you should distract yourself by talking to a friend, going for a run or watching television as soon as these thoughts begin.

Studying for long hours at a stretch does not translate into being well prepared for the exams. Non-stop studying brings down the mind’s ability to remember and recall. So always take a short break before hitting the books.

Deep breathing with your eyes closed while focussing on your body slows the psychological response to stress and brings down muscular and mental tension. It stabilises the biochemical response of the body by controlling hormonal secretion Induced by anxiety. You can do breathing exercises just before you begin a paper and start writing. It will help you focus your thoughts better and prevent panic attacks. You can do breathing exercises just before you begin a paper and start writing. Eight years have passed  
Since I placed my cherry seed in the grass,  
Must have a tree of my own ,I said-  
And watered it once and went to bed  
And forgot , but cherries have a way of growing  
Though no one's caring very much or knowing,  
And suddenly that summer, near the end of May,  
I found a tree had come to stay.  
It was very small, a five months child,  
Lost in tall grass running wild.  
Goats eat the leaves, grass cutter's scythe  
Split it apart, and a monsoon blight  
Shrivelled the slender stem... Even so,  
Next spring I watched three new shoots grow,  
The young tree struggle upwards thrust  
Its arms in a fresh fierce lust  
For light and air and sun.
